

## **Yokogawa at the APPEA 2009 Conference and Exhibition – May 31-June 3**

Yokogawa Australia will be an exhibitor at the 2009 Conference and Exhibition to be staged by APPEA – the Australian Petroleum Production and Exploration Association.

The event will be held at the Darwin Convention Centre from May 31 – June 3. It is recognised as Australia’s leading oil and gas industry event and considered to be one of the top three in the world, making it a ‘must attend’ for industry knowledge-sharing, networking and business opportunities.

Yokogawa is widely acknowledged as the premier supplier of automation systems and measurement instrumentation to the world’s upstream, downstream and LNG industries. The APPEA Exhibition is an opportunity to showcase our products and services to a market in which the company specialises.

“The three industry pillars for Yokogawa in Australia have traditionally been oil and gas, power, and mining. Looking forward, we see upstream oil and gas and LNG playing an even larger role in our business,” John Hewitt, Managing Director of Yokogawa Australia said.

Yokogawa has the tools and experience to build control instrumentation solutions for upstream operators involved in onshore or offshore production and all aspects of the LNG industry. The company offers:

- field sensing and actuation digital field instruments
- production control systems
- production management tools
- safety management systems
- asset management solutions.

Visit the Yokogawa Australia APPEA exhibit at Booth 3, just inside the main entry.
