

Be Invited

We proudly present at Interkama Yokogawa's VigilantPlant vision and roadmap - Delivering the Promise of Operational Excellence. This brings together the Yokogawa portfolio of products and suite of services for plant optimisation and sets a new standard for world-class process control and automation.

We will introduce CENTUM VP, a versatile technology platform and evolution of the distributed control system that makes possible the 'Plant of the Future' envisioned in Yokogawa's VigilantPlant concept.

Our total scope of solutions: control systems, safety systems, transmitters, flowmeters, recorders, data acquisition stations, analyzers and our wide ranging suite of services you can see at our booth in Hall 7, C47 from Monday thru' Friday.

Away from the hurly-burly Interkama, we cordially invite you to join us and welcome you to our special VigilantPlant Evening in the quiet surroundings of the World User Club.

Meet & Greet

Centrepiece is a live-demonstration of our new our new CENTUM VP system, a key enabler and building block of the next step of the VigilantPlant evolution. At the same time you will have the opportunity to meet our regional and international management, and last but not least we will treat you to some excellent food and refreshments.

Save the Date
