## YOKOGAWA MAREX STRIKES OIL IN HOUSTON

Yokogawa Marex Technology, of Cowes, Isle of Wight, reports outstanding business success at the recent ISA Expo'98 exhibition in Houston, Texas.

ISA Expo is the world's largest conference and trade show dedicated to measurement and control (M&C) technologies. Expo'98 attracted 40,000 M&C professionals, who viewed the latest and greatest offerings of more than 900 exhibitors.

At Houston, Yokogawa Marex showed its latest industry-leading releases – The Yokogawa Marex **Quantum** business-oriented PIM system with infinitely powerful Windows NT and Windows GUI – and **IRIS**, Yokogawa Marex's Integrated Refinery Information System.

Nigel Bowden, Yokogawa Marex International Sales Director, adds: "ISA Expo is the focus of world M&C attention each October when the show takes place in the US. It is a unique concentration of technological excellence and international interest and is the high point of our global show programme. This year we succeeded in making major new oil, gas and pipeline contacts, primarily in the US, which have confirmed our confidence in the ISA Expo series."
