

## Objectives

System Integrators who want to get familiar with the internal structure of a FAST/TOOLS system and how to use and understand the FAST/TOOLS debuggers. Redundancy and distributed system concepts will be in the agenda as well. This lecture-based course combined with some lab exercises provides the opportunity to fully understand the architecture and internal structure of FAST/TOOLS.

## Who should attend?

The course is meant for System Integrators who will tune, debug and integrate FAST/TOOLS with other systems.

## Prerequisite knowledge

Good knowledge about configuring FAST/TOOLS. Good knowledge of computers and MS-Windows.

## Programme

### Day 1:

- § The following subjects will explained: Introduction/ Relation to other tools/ Tool architecture/ Brick related information/ Functionality/ Architecture/ Process description/ Related documentation
- § FAST/TOOLS overview
- § FAST/CONVENTIONS
- § Installation of FAST/TOOLS
- §

### Day 2:

- § BUS/FAST
- § Durtm connections
- § DATABASE/FAST
- § ITEM/FAST
- § Time synchronisation
- § EQUIPMENT/FAST
- § HISTORY/FAST

### Day 3:

- § TERMINAL/FAST
- § INTEGRATION
- § Authorisation
- § ALARM/FAST
- § REPORT/FAST

### Day 3:

- § PROCESS/FAST
- § Quick load
- § COLOUR/FAST
- § ACCESS/FAST
- § AUDIT/FAST

### Day 3:

- § Redundant systems
- § Distributed systems
- § Error tracing
- § Tuning

## Duration

5 days
