Yokogawa Introduces STARDOM Network-Based Control System

Newnan, Georgia – For automation managers and engineers who demand the highest quality, security and precision, Stardom delivers unparalleled data access for process control and monitoring. Stardom is a network-based control system that offers proven process control technology in an innovative communications platform. It maximizes the effectiveness and efficiency of remote monitoring, control and diagnostics.

Ideally suited for mid-range applications, Stardom allows for the distribution of monitoring and control technologies within facilities and across multiple facilities in multiple locations. Stardom provides single-source access to information via a Web browser, and is viewable from almost any workstation, personal computer, or Personal Digital Assistant device. It makes vital information available in real-time, anywhere in the world.

Stardom reduces costs associated with engineering, maintenance, and management. Stardom offers a turnkey or application-specific solution for new systems, or it can be easily integrated into your existing automation infrastructure.

Stardom is manufactured by Yokogawa, a worldwide leader in process control technology. Stardom offers groundbreaking capabilities along with the peace of mind that comes from partnering with a company that sets industry standards for quality and integrity.

Stardom is an important breakthrough in process control, and the answer to the automation industry's communications challenges.
