YOKOGAWA SYSTEMS BUSINESS UNIT / SYSTEM INTEGRATOR PROGRAM

Stafford, Texas – The Systems Business Unit of Yokogawa Corporation of America announces a new system integrator program within North America. The new program addresses marketplace demands and provides Yokogawa users with a vigilant and customer-centric industrial automation solution.

The System Integrator Program is a three-tiered authorization program designed to leverage the existing customer relationship, geographical preference, application expertise, market domain and value-added solutions for Yokogawa's Enterprise Technology Solutions (ETS). The program enhances Yokogawa's ability to partner with system integrators that add the most value to supporting Yokogawa's existing and developing customer base as well as simultaneously enhancing Yokogawa's presence in North America.

"The System Integrator Program allows for Yokogawa customers to select the best talent that can assist with a solution optimization to meet their needs and requirements," said Arif Mustafa, Systems Integrator Program Manager for Yokogawa Corporation of America. "The three tier program will allow for a resource pool of authorized system integrators from which customers can select to address their needs. Our customers can then be assured of the credibility and integrity of the Yokogawa solution provided by the authorized integrator."

The program allows for system integrators to work with Yokogawa in a flexible manner adding value to our customers based on their core expertise, infrastructure and industry specific application expertise. Yokogawa's intent with the program is to address market demands on a cost-competitive basis that encompasses distributed

control systems (DCS), advanced application suites, enterprise level integration and the incorporation of bus technologies.

Yokogawa Corporation of America system integrators can continue to depend on the field-proven, reliable CENTUM CS1000/ 3000 DCS architecture that continues to incorporate new technologies allowing and accommodating open architecture, fieldbus technology, plant resource management and optimization, ETS, batch applications and process efficiency, and optimization solutions.

Yokogawa is committed to work with system integrators to provide platforms that will assist in developing core application expertise, provide for industry specific solutions and in turn reduce the total cost of ownership (TCO). Yokogawa continues to enhance the CENTUM CS1000/3000 DCS platform with the inclusion of current leading-edge technologies, and most importantly, sound migration strategies for existing customers.

Please contact Yokogawa at www.yokogawa.com or 281-340-3800 for additional information on the System Integrator Program.
