Yokogawa Introduces New Multi-Function Calibrator

Yokogawa Meter & Instrument Corporation is proud to introduce the *CA150 Multi-function Portable Calibrator*. This instrument boasts accuracy of 0.02% of DC V, incorporates an independent 24 DC V power supply for loop check of two wire transmitters, delivers a high response speed with pulsing excitation current which allows the CA150 to accurately calibrate digital temperature transmitters.

This compact yet powerful calibrator will simultaneously source and measure DC V, A, RTD, TC & Pulse. Provides memory capable of storing up to one hundred (100) data items and provides three (3) unique sweep functions, i.e., step, linear and program (start from memory).

This all-new state of the art hand held calibrator is available today from your authorized Yokogawa sales person.

CA150 - \$1,900.00

CA150/SP1 - \$2,200.00 (includes AC Adapter, NIMH Batters and Carrying Case/Strap)

About Yokogawa Corporation of America

Yokogawa Corporation of America is the North American unit of \$4 billion Yokogawa Electric Corporation, a global leader in the manufacture and supply of instrumentation, process control, and automation solutions. Headquartered in Newnan, Georgia, Yokogawa Corporation of America serves a diverse customer base with market-leading products including optical test solutions, communication test and measurement, flow meters, transmitters, controllers, recorders, data acquisition products, meters & instruments, distributed control systems, and more. Yokogawa's AQ2200 Multiple Application Testing Systems is a generational replacement of its' popular ANDO Electric AQ8200 MATS platform: providing greater performance and efficiency.
