Yokogawa Announces Dates for Annual Technology Fair & User Conference

Houston, Texas - Yokogawa Corporation of America announced today that it will hold its eighth Technology Fair & User Conference April 7-10, 2008, at the Hilton Americas Hotel in downtown Houston, TX.

“The success of our 2006 conference was astronomical,” said David Johnson, President and CEO of Yokogawa Corporation of America. “It propelled the Yokogawa brand forward and really reinforced the belief in our commitment to the North American market. We look forward to providing an exceptional forum for Yokogawa users and potential users to exchange information, recount experiences and express their needs between themselves and Yokogawa, with respect to issues of industrial control, automation and management in order to improve their business operations.”

The conference is designed for current and future users of Yokogawa products and solutions in a number of industries including Chemical, Pharmaceutical, Power, Refinery, Petrochemical and Upstream Oil & Gas. It will offer attendees the chance to participate in CEU-accredited courses and technical workshops, share problem-solving approaches to practical applications, and see how Yokogawa automation solutions deliver measurable results.

For more information regarding this event, please contact Kari Mitchell at 281-340-3867, kari.mitchell@us.yokogawa.com, or visit www.yokogawa.com/us in the coming weeks.
