Yokogawa to Offer CEU Training at User Conference & Technology Fair

Yokogawa Corporation of America will offer four Continuing Education Unit (CEU) classes during its 2008 Technology Fair & User Conference to be held April 8-10 at the Hilton Americas in downtown Houston, Texas.

YCA is pleased to be partnering with ISA to provide training classes with CEUs (Continuing Education Units) for the User's Conference and Technology Fair. The CEU accreditation shows their classes adhere to strict guidelines for the planning, developing, conducting and record keeping for the training. CEUs are a valuable way of showing knowledge growth, within an industry, whether for professional certification requirements or job expertise improvement.

The courses, listed below, were selected because of their timeliness in the current process control environment and requests from our customers. We know that you will find the information invaluable and look forward to seeing you there.

The one-day courses, offered through ISA's Training division, will be held on April 7 from 8-5 PM. They are:

Overview of Wireless Technology (IC85C)

Safety Instrumented Systems: The Must know for Implementation (EC50C)

Securing Industrial Networks: Cyber Protection for Automation, Control and SCADA Systems (IC32C)

Overview of Measurement and Control Fundamentals (FG05C)

To view course descriptions or to register, go to www.yokogawa.com/us and click on the link for Technology Fair & User Conference.
