Release #: 891

## **Yokogawa releases new Optical Return Loss (ORL) Module for its Multiple Application Test System (MATS)**

Yokogawa Corporation of America is pleased to announce the availability of its new Optical Return Loss module for its modular rack mounted system AQ2200 Multiple Application Test System. The AQ2200-271 ORL module provides key measurement for optical passive components and works closely with other existing AQ2200 modules for a complete testing solution.

### **About the AQ2200-271**

This new module measures optical return loss while simultaneously measuring insertion loss (IL). The dynamic range is 65dB with measurements at 1310nm ( $\pm 30$ nm) and 1550nm ( $\pm 30$ nm). Simplified front panel operation and remote measurements via GPIB or LAN is fully supported. Measurement parameters can also be preset to improve speed of manual and automated testing.

Yokogawa is exhibiting the AQ2200-271 ORL module live in booth 1535 at the OFC NFOEC 2008 tradeshow in San Diego, CA.

### **About Yokogawa Corporation of America**

Yokogawa's global network of 18 manufacturing facilities, 84 companies, and over 650 sales and engineering offices spans 33 countries. Since its founding in 1915, the US\$4 billion company has been engaged in cutting-edge research and innovation, securing more than 7,000 patents and registrations, including the world's first digital sensors for flow and pressure measurement. Industrial automation and control, test and measurement,

information systems and industry support are the core businesses of Yokogawa. For more information about Yokogawa, please visit our web site at [www.yokogawa.com](http://www.yokogawa.com).
