Yokogawa Introduces Back-lit Switchboard Meter

Yokogawa Corporation of America Meters & Instruments Division has introduced a new series of back-lit switchboard meters. These 4 1/2" switchboard meters are available with either a white or red scale and accept inputs of DCV, DCA, ACV or ACA.

The long lasting LED illumination eliminates the need for frequent replacement of incandescent lamps. Various DC back-light voltages are available. This unique series of meters complements the broad line of switchboard and panel meters, power monitoring instruments and portable test instruments available from Yokogawa.
