Release #: 1016

New Yokogawa Y-Plant Alert™ Sequence of Event Recording and Alarm Annunciation System

The Y-Plant Alert™ system offers Alarm Event Sequence of Event Recording and Annunciator functions. Alarm Events are time stamped with one millisecond resolution. The system was developed based on customer input of what is needed in a modern plant alarm/event capture and notification system. The key features are:

- Easy configuration.
- "Plug & Play" installation with minimal to no wiring changes required (Y-Plant Alert solution matches existing input connectors for retrofits).
- Event storage in a common, widely accepted SQL database format that allows for easy report generation (including customized reports).
- Security of buffering Alarm Events in the high speed I/O system in case of PC failure ensures no data loss.

If your facility has considered updating its legacy alarm annunciation system or sequence of event recording solution in the past but was deterred by high costs or lengthy retrofit downtime – Y-Plant Alert is worth a fresh look. Due to Y-Plant Alert's novel architecture, it is deployed at a

fraction of the cost of competitive systems and typical install/test times have been one to two days.

Visit us during PowerGen (December 13th-15th) at Booth #2611 to view Yokogawa's Y-Plant Alert or online at <http://www.yplantalert.com>.

About Yokogawa Corporation of America

Yokogawa Corporation of America is the North American division of Yokogawa Electric Corporation and a key part of Yokogawa's global network of 25 manufacturing facilities and 80 companies spanning 54 countries. Since its founding in 1915, the US \$3 billion company has been engaged in cutting-edge research and innovation, securing more than 7,200 patents and registrations, including the world's first digital sensors for flow and pressure measurement. Industrial automation and control, test and measurement, information systems and industry support are the core businesses of Yokogawa.
